

Community Storytellers ***Celebrating Our Elders*** ***A digital storytelling project***

ICal, Intergenerational Centre for Action Learning is a non-profit organization dedicated to strengthening community by promoting positive age relations through intergenerational collaborations. In this project, intergenerational teams produce Digital Stories (3-5-minute videos) about the personal experiences of seniors in the community.

These movies are shared with the public on the Internet, at screening events and at other venues.

Through this project, intergenerational teams will discover a new and exciting way to explore and preserve history while helping honour the contributions of older generations.

The project was developed with funding from the Government of Canada's New Horizons for Seniors Initiative.
